

Beaudekert Fine Mattresses: Information Sheet

Our Mattresses

Our bespoke bed bases and mattresses are specifically designed for Four Poster Beds. All Beaudekert mattresses are handmade to order in the UK from the highest quality fillings - layers of superior cotton felt, silk, long-stranded horsehair and combed lambs wool laid over our choice of fine quality pocketed spring units. Our pocket spring mattresses use the uniquely English system of small individual springs, each in its own calico pocket. With each small spring reacting to the pressure applied to the mattress a perfect degree of support is gained across the length of the body - with maximum support given automatically where it is needed most - ensuring the spine is kept straight even if you sleep on your side.

Our Commitment

As proud as we are of the high quality of our mattresses, we know it is impossible to 'road-test' a bed and therefore we provide the added assurance that if you are not fully satisfied with the level of comfort within the first four weeks, the mattress can be returned or exchanged. We are pleased to offer a full 10-year quality guarantee on our mattresses.

Options

Our mattresses come in grades that vary according to the spring count, the luxuriousness of the material used for the fillings and the finishing details. Our mattresses are made to the customer's specification of size and a softer, medium, firm or extra firm tension. All are superb mattresses will give a wonderful night's sleep and are backed by our knowledge and experience.

The Beaudekert Berkeley Mattress. Our luxury mattress is made with the very finest materials. The first impression is that it feels softer but it provides maximum support and responsiveness. To the over 5000 individual springs built up on two layers of support pocket springs over a core binary spring unit, are added luxurious layers of teased horsetail, lambs wool, plus luxury silk and cashmere. The mattress is finished with a specially woven stretch ticking for maximum responsiveness.

The Beaudekert. Our most popular mattress is made with a high spring count of 2200 pocket springs for great comfort with the addition of fine natural materials in cotton, horse hair and lambs wool layers. Hand-tufted with traditional wool tufts, the Beaudekert mattress is finished with three layers of hand side-stitching.

The Beaudekert Anglesey Mattress. Our Anglesey mattress is made with a 2200 spring count and fine but more affordable materials. There is a choice of soft, medium, firm and extra-firm tensions. The mattress offers great comfort and a wonderfully restorative sleep.
